CVA Credential Information Session

Virtual session using Zoom

01:00 PM - 02:30 PM EST

Take the next step in your career as a leader of volunteers and obtain a Certification in Volunteer Administration (CVA).

Leaders in non-profit organizations and community groups increasingly understand that volunteers can be a critical resource for delivering on a mission. Effective people management and community engagement is imperative – whether they be paid or unpaid. As a result, employers expect that those individuals tasked with mobilizing and coordinating volunteer engagement demonstrate a thorough knowledge of effective practices and an understanding of how to apply that knowledge in support of real-world organizational priorities.

Each year, millions of Americans interact with our criminal justice system. The vast majority of these individuals will be compelled to complete community service hours as a part of their sentence- often in exchange for reducing fines or avoiding incarceration. While originally well-intentioned, court-ordered service programs often place undue burdens on folks who live at the intersection of multiple marginalized identities. For those convicted of crimes and recently released from incarceration, their first foothold back into the community is often nonprofit organizations, and yet, the opportunities for volunteers with criminal records are quite limited, and the amount of mandatory hours often creates financial hardship.

In this session we will discuss the history of community service & diversion programs, the staggering economic value that these individuals provide to the third sector, concerns around exploitation of this compelled labor, and ways we can provide more meaningful community service to reduce recidivism rates.

In this training, you will learn:

Understand the historical context and evolution of court-ordered community service programs, including their initial intentions and their impact on individuals with intersecting marginalized identities.

Identify the economic and societal contributions of individuals completing court-ordered service, while exploring the ethical concerns regarding the potential exploitation of compelled labor within these programs, especially in light of the barriers returning community members face in seeking employment.

Explore actionable strategies and frameworks to create more meaningful, skill-building, and impactful community service opportunities, aiming to reduce recidivism rates and foster positive reintegration for individuals with criminal records.
