

## Calendar of Events

---

March 17, 2025  
- March 21, 2025

**Homicide Investigation**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**  
08:00 AM - 05:00 PM EST  
Mary Ankenbauer, 904-620-4786  
info@iptm.org

*Whether you are the first responder or the lead investigator, this course will give you the knowledge and skills to thoroughly and professionally investigate any possible homicide situation.*

*We will show you the various types of homicides that you may encounter and common approaches to each. You will learn a systematic process for handling the crime scene, from the initial approach through scene documentation and evidence collection. And, you'll see how the latest technology and forensic sciences can assist you in your investigation.*

*Beyond the crime scene, you'll also learn about criminal profiling, interrogation techniques and how to handle the news media's involvement.*

### *Topics Include*

*Death scene preservation  
Duties of the first officer on the scene  
Investigative procedures at the death scene  
Team approach to death investigations  
Autoerotic death investigations  
Causes and manner of death  
Time of death determination  
Criminal personality profiling  
Organized vs. disorganized crime scenes  
Death scene search techniques  
Handling the news media in death investigations  
Suicide investigations  
Homicide interrogation techniques*

### *Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel*

*Class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

March 17, 2025  
- March 21, 2025

**Crime Scene Reconstruction**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@unf.edu

*Designed for experienced investigators and crime scene technicians, this advanced course teaches the use of scientific methods, evidence analysis and deductive reasoning in determining the series of events in a crime and accurately reconstructing the resulting crime scene.*

*We will show you time proven techniques and the procedures to follow in reconstructing a variety of different incidents within a scene, from the identification and analysis of the evidence to the documentation and presentation of your findings.*

*As part of the course, you will participate in practical exercises designed to strengthen your knowledge in areas such as bloodstain pattern analysis, pattern evidence and gunshot trajectory reconstruction. You will participate in useful testing and experimentation involving evidence, to include a live fire shooting of a vehicle at the range. In addition, you will learn how to determine the degree of certainty in your findings.*

*To successfully complete the course, you will work with several actual case studies, completing the reconstruction of the crime scenes and presenting your findings to the class.*

*Topics Include*

*Sources of information and evidence*  
*Dynamics of the reconstruction process*  
*Bloodstain pattern analysis*  
*The reconstruction model*  
*Pattern evidence and analysis*  
*Trajectory reconstruction*  
*Courtroom testimony and Daubert hearing preparation*  
*Reconstruction procedures*

*Audience*

*Experienced investigators and crime scene technicians, seasoned detectives, investigations supervisors, medical examiner and coroner investigators, and military investigative personnel*

*This course is restricted to active sworn and non-sworn law enforcement and medical examiner personnel.*

March 18, 2025

**Critical Incident Management: Documentation, Evidence Handling & Collaborative Protocols**

<https://gapscience.com/webinar-critical-incident-management-documentation-evidence-handling-collab>

01:00 PM - 03:00 PM EST

Gap Science, 4075380104

info@gapscience.com

*This comprehensive webinar provides professionals in law enforcement, forensics, and related fields with the critical tools and knowledge needed to ensure successful crime scene investigations in the most critical of incidents. From initial documentation and evidence handling to working with autopsies and maintaining investigative cohesion, this webinar covers the essential protocols and procedures to enhance your investigative practices.*

*Why Attend?*

*Learn proven strategies for accurate crime scene documentation*

*Understand how to preserve and handle various types of evidence*

*Enhance your skills in managing autopsy information and collaborating with forensic experts*

*Improve coordination across agencies and departments involved in investigations*

*Gain hands-on insights into the standards of evidence collection in complex cases*

*Join us to learn the tools for better scene management for officer involved incidents and other critical incidents!*

March 24, 2025

- March 28, 2025

**Crime Scene Investigations**

**Leon County Sheriff's Office**

**2825 Municipal Way**

**Tallahassee, FL 32304**

08:00 AM - 05:00 PM EST

Phil Sanfilippo (Tritech), 9548062123

phil@tritechusa.com

*Tri-Tech Training*

March 24, 2025  
- March 26, 2025

**Advanced Homicide Investigation**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This course will further enhance the skills you acquired in IPTM's Homicide Investigation course and supply you with the knowledge and abilities to handle even the most challenging homicide investigations.*

*You will learn how to organize a complex homicide investigation and how to apply advanced forensic techniques to the case. We will discuss criminal profiling and abnormal psychology and you will learn specific interrogation techniques to use on the suspects.*

*Lectures during the course will be held to a minimum. Instead, emphasis will be placed on practical exercises. You will be provided the opportunity to apply the skills you have acquired while studying complex homicide cases presented by the instructors.*

*Topics Include*

*Organization of a complex homicide investigation*  
*Criminal investigative analysis (criminal profiling)*  
*Abnormal psychology for investigators*  
*Interrogation techniques for homicide suspects*  
*Application of advanced forensic techniques*  
*Reconstruction of a high profile homicide case*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel*

*This class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

March 31, 2025  
- April 4, 2025

**Interviews and Interrogations**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This truly practical course will provide you with the skills to gain high quality information from individuals, no matter what their status might be in the investigation.*

*Topics Include*

*The verbal communication process*

*Witness memory enhancement*

*Flow of information*

*Interviewing process*

*Kinesics interview techniques*

*Detecting deception*

*Videotaping and recording interrogations*

*Interview of rape victims*

*Interview of child witnesses and victims*

*Criminal personality profiling for interviews*

*The effective interrogator*

*Legal aspects*

*Psychology of interrogations*

*The first three topics will stress the methods you can employ to establish rapport, improve feedback and become more discerning through efficient listening. An examination of the interviewing process will give you a structured interview to expand your ability to obtain accurate information and detect deception.*

*Through criminal personality profiling, you will be able to more accurately determine the personality type you are confronting and some of the interviewing techniques best suited to elicit information from that individual.*

*This course focuses on skill development and will enhance your ability to conduct effective interviews and interrogations.*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators and military investigative personnel*

*This class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

April 1, 2025

**The Power of 'No Man': Fostering Constructive Dissent for Stronger Teams & Better Outcomes**

<https://gapscience.com/webinar-the-power-of-the-no-man-fostering-constructive-dissent-for-stronger-teams>

02:00 PM - 03:30 PM EST

Gap Science, 4075380104

info@gapscience.com

*In today's fast-paced and high-stakes environments, teams need more than just people who agree and follow the status quo. A "No Man"—someone who challenges ideas, points out problems, and is willing to be labeled "difficult"—can be an invaluable asset. This webinar will explore the role of a "No Man," how to leverage them effectively, and how to cultivate a team culture that encourages constructive dissent to drive better communication, innovation, and results.*

*Whether you're in a supervisory or non-supervisory role, this webinar will provide insights on how to use the "No Man" to improve your team's performance and communication, especially within complex fields like crime scene investigation, evidence handling, and laboratory work.*

*Join us to learn how to turn dissent into a productive tool for growth and innovation, understand the balance between constructive criticism and disruptive negativity, & gain insights into improving team communication and problem-solving.*

April 7, 2025

- April 11, 2025

**Basic Crime Scene Photography**

**Boynton Beach Police Department**

**2100 High Ridge Rd.**

**Boynton Beach, FL 33426**

08:00 AM - 05:00 PM EST

Phil Sanfilippo, 1-800-438-7884 ext.

phil@tritechusa.com

[https://reg.learningstream.com/reg/event\\_page.aspx?ek=0027-0031-ba23de2f4ca1483996b51d17af53d0f2](https://reg.learningstream.com/reg/event_page.aspx?ek=0027-0031-ba23de2f4ca1483996b51d17af53d0f2)

April 14, 2025  
- April 18, 2025

**Deviant Sexual Behavior and Related Criminal Activity**  
**Florida's Forensic Institute for Research and Security**  
**10370 Charles Bo Harrison Way**  
**Land O' Lakes, FL 34637**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*To successfully solve violent, sexually motivated crimes, you need to be aware of the criminal personality you are confronting. You also need to be aware of the special investigative skills that are needed to manage and investigate these cases, as well as the proper evidence needed for prosecution.*

*This course will cover basic and advanced investigative concepts and provide you with the knowledge and skills of an effective sex crime investigator. Students will engage in an in-depth study of the lust murderer, the pedophile, the child molester and the rapist. We will also explore the psychology of the sex offender, as well as the victim, and explain the role physical evidence and the medical examiner's findings play in the successful investigation and prosecution of these cases.*

*As these cases are often sensitive in nature, you'll also learn the principles of victimology in sexual assaults and how to best deal with the victims' psychological problems. We'll examine the latest proven techniques for interviewing both adult and child victims suffering the after effects of such a traumatic experience.*

*Topics Include*

*Overview of sexually motivated crimes*  
*The pedophile vs. the child molester*  
*The criminal mind and abnormal psychology*  
*Paraphilia and erotosexual dysfunction*  
*Exploitation of children, child pornography and sex rings*  
*Behavioral and personality traits of rapists*  
*Physical evidence in sex crimes*  
*Serial and lust murders*  
*Autoerotic and equivocal death investigations*  
*Crime scene profiling*

*Audience*

*Newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, prosecutors and military investigative personnel*

*This class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

April 14, 2025  
- April 18, 2025

**Bloodstain Interpretation**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST  
Mary Ankenbauer, 904-620-4786  
info@unf.edu

*Bloodstain pattern interpretation can play an important role in determining what happened at a crime scene. This intensive "hands-on" course will arm you with the skills to identify, analyze, document, and collect bloodstained evidence.*

*Through a variety of practical exercises, we will teach you how a bloodstain pattern is created and the physical mechanics involved. You will learn the various types of patterns that may be encountered and methods for determining their directionality and angles of impact on different surface textures. Together with an analysis of the evidence, you will see how to separate the patterns into events and determine the probable sequence in which they occurred.*

*We will also discuss the proper methods of photographing and documenting bloodstain patterns along with the proper handling and packaging of bloodstained evidence.*

*Topics Include*

*Origin of bloodstain patterns*  
*Identification of stains and patterns*  
*Collection and preservation of bloodstain evidence*  
*Photography and documentation techniques*  
*Interpretation of bloodstain patterns*  
*Pattern analysis in scene reconstruction*  
*Case preparation and presentation*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel and prosecuting attorneys*

*This class is restricted to active sworn and non-sworn law enforcement, investigators, and prosecuting attorneys employed by governmental agencies.*

May 5, 2025  
- May 7, 2025

## **Economic Crimes Investigations: Current Trends**

**Altamonte Springs Police Department**

**225 Newburyport Avenue**

**Altamonte Springs, FL 32701**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*Economic crimes have become the fastest growing and costliest crimes in the U.S. in recent years. Frauds are also one of the most difficult to understand and investigate. This updated course explains the complexities of fraud investigations and arms you with a systematic approach and specific techniques for handling a wide range of financial and consumer fraud-related crimes. It relies heavily on student interaction, case studies, and practical scenarios to help increase your understanding of the ever-changing nature of these investigations.*

*Our goal is to provide you with current information effecting Economic Crimes Investigators with different levels of training and experience. Topics range from simple check fraud and credit card fraud to identity theft and major offenses like embezzlement, internet scams, and Ponzi schemes. In addition, you will learn current trends involving electronic fund transfers and cryptocurrency, as well as how to investigate these crimes. We will show you how to handle the day-to-day issues with conducting these investigations. These issues include how to determine the appropriate jurisdiction for cases, which cases are civil or criminal, and reviews a variety of investigative resources to assist the students with their investigations. We will also provide you with receive recent examples of a variety of legal processes needed to conduct these investigations.*

### *Topics Include*

#### *Introduction into Economic Crimes:*

*Triaging cases  
Determining civil vs. criminal  
Jurisdictional issues  
Case management  
Subpoenas, search warrants and court orders  
Resources  
Legal process*

#### *Classifying and investigating the different types of fraud:*

*Check fraud  
Credit/debit card fraud  
Identify theft  
Internet/computer crimes  
Embezzlement  
Ponzi/pyramid schemes  
Money laundering  
Racketeering  
EFT's/cryptocurrency*

*Audience*

*Patrol officers, criminal investigators, and economic crimes unit personnel who are*

*responsible for conducting fraud investigations*

*This course is restricted to sworn and non-sworn law enforcement personnel.*

May 13, 2025

**From the Crime Scene to the Courtroom: Teh Case of the Serial Puppy Killer**  
**FIU Global Forensic and Justice Center**  
**8285 Bryan Dairy Road**  
**Largo, FL**

09:00 AM - 04:00 PM EST

Amanda Fitch, 6462853303

amanda.fitch@aspca.org

*Join us for an immersive, hands-on workshop based on the facts of a real criminal case. This workshop will offer a unique dual-track learning experience designed for professionals involved in crime scene investigations, veterinary forensics and law. Instructed by experts from the Animal Legal Defense Fund (ALDF), the American Society for the Prevention of Cruelty to Animals (ASPCA), and the U.S. Fish and Wildlife Service (USFWS), participants will choose between two morning tracks at registration:*

*Track 1: Crime Scene Investigation: Process a mock crime scene and practice proper techniques for Scene documentation, identification, collection, and packaging of evidence, and analysis of blood samples.*

*Track 2: Veterinary Forensics: In this track, a forensic veterinarian and pathologist will walk participants through the examination process for both live and deceased mock scenario animal victims, emphasizing examination techniques following ASB published standards, evidence collection, preservation, and chain of custody.*

*In the afternoon, the participants from both tracks will come together to review their findings in a collaborative session led by a prosecutor experienced in animal crime cases. This interactive segment will focus on integrating forensic findings into a strong legal case to help ensure that investigations result in meaningful outcomes in the courtroom.*

*This workshop offers the opportunity to strengthen your skills and investigative techniques in a state-of-the-art educational facility while emphasizing the importance of interdisciplinary collaboration for creating a clear roadmap to turn forensic evidence into a strong legal case that can withstand scrutiny in court.*

May 14, 2025

**Demystifying Testifying; Courtroom 101**

**Stuart, FL Police Department**

**830 SE M.L.K. Blvd**

**Stuart, FL 34994**

08:00 AM - 05:00 PM EST

Joe Torok, 9547027242

joe@csiforensicfoundations.com

*This one-day class is designed for anybody who is facing the challenge of testifying and has either never had to do so previously or has minimal testifying experience. Students will learn about the process a case takes from arrest to trial, along with the various proceedings they may be exposed to. Courtroom etiquette as well as proper decorum are discussed. Students will go through several hands-on exercises to help eliminate or minimize the anxiety many will encounter during one of the most stressful parts of law enforcement. The day will end with each participant putting use the techniques they learned throughout the day as they are called to testify to a mock crime scene they will be introduced to earlier in the day. Students will walk away from this class with a greater ability to confidently testify, which leads to a greater rate of successful prosecutions. The instructor is a 36-year law enforcement veteran who has testified over 400 times in County, State and Federal Court proceedings. He has testified in over 60 homicide cases including mass casualty incidents. He is a Court certified expert witness in Blood Spatter, Blood Detection, and Shooting Reconstruction. This class is great for law enforcement officers, crime scene technicians, property and evidence custodians, code enforcement officers and anybody who will have to testify in any court proceeding.*

May 19, 2025

- May 23, 2025

**Crime Scene Photography**

**Virginia Commonwealth University**

**817 West Franklin Street**

**Richmond , VA 23220**

08:30 AM - 05:00 PM EST

- June 18, 2025

**Advanced Homicide Investigation**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This course will further enhance the skills you acquired in IPTM's Homicide Investigation course and supply you with the knowledge and abilities to handle even the most challenging homicide investigations.*

*You will learn how to organize a complex homicide investigation and how to apply advanced forensic techniques to the case. We will discuss criminal profiling and abnormal psychology and you will learn specific interrogation techniques to use on the suspects.*

*Lectures during the course will be held to a minimum. Instead, emphasis will be placed on practical exercises. You will be provided the opportunity to apply the skills you have acquired while studying complex homicide cases presented by the instructors.*

*Topics Include*

*Organization of a complex homicide investigation*  
*Criminal investigative analysis (criminal profiling)*  
*Abnormal psychology for investigators*  
*Interrogation techniques for homicide suspects*  
*Application of advanced forensic techniques*  
*Reconstruction of a high profile homicide case*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel*

*This class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

June 19, 2025  
- June 20, 2025

## **Bloodstain Interpretation for Detectives**

**IPTM - University of North Florida**

**12000 Alumni Drive**

**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This course is specifically designed for detectives who investigate violent crimes but are not responsible for the documentation or collection of blood evidence.*

*The objective is to enhance the knowledge of homicide and crimes against persons detectives in various areas of bloodstain pattern analysis, with an emphasis on understanding the value of bloodstain evidence and how it can be effectively applied as a forensic tool throughout their investigation. We will provide you with a cohesive understanding of the cause, effect, and implications of different bloodstains and patterns, as well as the actions that caused them.*

*We will use several actual case studies to emphasize and illustrate the concepts and fundamentals discussed during lectures. This course is not designed for crime scene investigator, as it does not have a laboratory component.*

### *Topics Include*

*How to recognize bloodstains and patterns that provide probative information regarding the actions that caused the blood-letting events and movements of individuals - during and after the events*

*How to extrapolate relevant evidence from altered scenes*

*How to recognize the differences between medical and suspicious deaths*

*Understanding the documentation processes available to capture the bloodstains and patterns for future analysis by an expert*

*Types of bloodstains to select for DNA analysis that will provide the most probative value to the investigation*

*What to expect from a bloodstain pattern analysis conducted by an expert*

*How expert analysis can be applied throughout the investigation and its relevance in criminal proceedings*

### *Audience*

*Law enforcement, detectives, investigators, and military investigative personnel. It is not designed for crime scene investigator, as it does not have a laboratory component.*

*Class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

June 30, 2025  
- July 1, 2025

**Cold Case Investigations**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**  
08:00 AM - 05:00 PM EST  
Mary Ankenbauer, 904-620-4786  
info@iptm.org

*This two-day course will further enhance the skills you acquired in IPTM's Homicide Investigation and Advanced Homicide Investigation courses. You will learn how to bring life back into your agency cold cases, not only by using modern technology that wasn't available to previous investigators but also going back to the basics. This course will also touch on the use of Forensic Genetic Genealogy (FGG) in cold cases.*

*You will learn about some of the fatal mistakes made in these investigations that have both contributed to the case going cold but also remaining cold. You will learn about some of the new techniques and technologies available to detectives today.*

*These types of cases are some of the most difficult to solve, but also the most rewarding when they are solved, and you can give the victim the justice they deserve and their families some peace.*

*Topics Include*

*Reasons for family denial of suicide*  
*How to identify a viable cold case*  
*How to prioritize and organize cold cases*  
*Systematic review of your cold case*  
*Forensic advancements & investigative tools for cold cases*  
*Suspect identification and analytical workup*  
*The witness/suspect interview process years after the crime*  
*Family notification*  
*Unidentified remains and the use of NAMUS*  
*Examining mistakes that may have been made*  
*Cold case reviews*

*This course focuses on skill development and will enhance your ability to conduct effective interviews and interrogations.*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators and military investigative personnel*

*This class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

August 18, 2025  
- August 19, 2025

## **Forensic Bloodstains: Enhancement and Documentation**

**IPTM - University of North Florida**

**12000 Alumni Drive**

**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@unf.edu

*This course will provide you with in-depth instruction on the correct procedures for processing blood evidence at a crime scene or in a lab. You will gain an understanding of basic bloodstain patterns encountered at crime scenes, how to properly document those patterns, and how to utilize various chemical enhancement techniques. You will learn methods to evaluate a crime scene to determine the type of crime that has been committed and the physical parameters of the area of involvement. We will show you how to properly locate, document, collect, and preserve the physical evidence at the scene. You will also be introduced to networks and databases that can assist you in the investigative process.*

*Exercises will reinforce the classroom discussions to enhance your understanding of the basic principles of bloodstain pattern analysis, enhancement techniques, including chemical and alternate light sources, and proper documentation and collection.*

### *Topics Include*

*Crime scene analysis*

*Overview of bloodstain principles*

*Recognition of bloodstain patterns*

*Presumptive tests for blood*

*Blood chemical enhancement techniques*

*Photography documentation*

### *Audience*

*Crime scene technicians, crimes against persons detectives, investigations supervisors, forensic investigators, first responding officers, medical examiner and coroner investigators, military investigative personnel, and non-sworn personnel who process crime scenes.*

*This course is restricted to active sworn and non-sworn law enforcement and medical examiner personnel.*

August 18, 2025  
- August 20, 2025

**Advanced Homicide Investigation**  
**Altamonte Springs Police Department**  
**225 Newburyport Avenue**  
**Altamonte Springs, FL 32701**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This course will further enhance the skills you acquired in IPTM's Homicide Investigation course and supply you with the knowledge and abilities to handle even the most challenging homicide investigations.*

*You will learn how to organize a complex homicide investigation and how to apply advanced forensic techniques to the case. We will discuss criminal profiling and abnormal psychology and you will learn specific interrogation techniques to use on the suspects.*

*Lectures during the course will be held to a minimum. Instead, emphasis will be placed on practical exercises. You will be provided the opportunity to apply the skills you have acquired while studying complex homicide cases presented by the instructors.*

*Topics Include*

*Organization of a complex homicide investigation*  
*Criminal investigative analysis (criminal profiling)*  
*Abnormal psychology for investigators*  
*Interrogation techniques for homicide suspects*  
*Application of advanced forensic techniques*  
*Reconstruction of a high profile homicide case*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel*

*This class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

August 25, 2025

**Quality Assurance for Latent Print Units**

**Osceola County Sheriff's Office**

**2601 East Irlo Bronson Memorial Hwy**

**Kissimmee, FL 34744**

08:00 AM - 05:00 PM EST

Meredith Tise, 727-275-0327

meredith@suncoastforensics.com

*Maintaining accuracy and reliability in latent print analysis requires strong quality assurance practices, regardless of accreditation status. This training provides forensic professionals with the tools to strengthen their latent print unit's operations and credibility. Topics include: Personnel Qualifications, Training Programs and Competency, Proficiency Testing, Proper Examination Documentation, Case Reports, Technical and Administrative Reviews, and Case and Evidence Audits. This course is ideal for latent print examiners, supervisors, and forensic quality managers seeking to improve their agency's forensic processes and casework integrity.*

September 8, 2025  
- September 10, 2025

**Major Case Management**  
**Altamonte Springs Police Department**  
**225 Newburyport Avenue**  
**Altamonte Springs, FL 32701**

08:00 AM - 05:00 PM EST  
Mary Ankenbauer, 904-620-4786  
info@iptm.org

*This course will arm you with a solid foundation to efficiently and effectively manage a variety of major case situations including multi-incident investigations, cross-jurisdictional cases, mass arrest projects, and more.*

*We will take you through the process of handling major cases beginning with the policies and infrastructure that should be in place before a situation occurs. We will examine a typical major case organizational structure and discuss the effective use of chain of command in both single agency and multi-agency situations.*

*Next we will take you step-by-step through the various components of major case management. You will learn how to handle the initial crisis, manage the crime scene, allocate personnel, track the leads and the investigation, coordinate the assisting agencies, and handle the news media. We will also discuss the pros and cons surrounding the use of 24-hour hotlines, citizen volunteers, confidential sources, special prosecutors, and others.*

*Throughout the course, you will learn about the state and federal resources available to you during these investigations. You will also learn the case reporting and documentation that should be completed along the way so that proper evaluation and debriefing can be done upon the conclusion of operations.*

*Topics Include*

*Major case management goals and objectives*  
*Types and components of major cases*  
*Multiple incident or "crime pattern" investigations*  
*Extended resource/long term investigations*  
*Multi-jurisdictional major cases*  
*Undercover and sting operations*  
*Mass arrest projects*  
*Operational and support functions*  
*Communications plan and information management*  
*Lead management and follow-up*  
*Single agency and multi-agency task force operations*  
*Mutual aid agreements and memorandums of understanding*  
*Special problems and common errors*  
*State and federal resources*  
*After action reporting and debriefing*

*Audience*

*New and veteran investigative unit supervisors, patrol supervisors seeking command responsibilities, division commanders, and agency executives.*

*This course is restricted to sworn and non-sworn law enforcement personnel.*

September 22, 2025  
- September 24, 2025

## **Advanced Bloodstain Pattern Analysis**

**IPTM - University of North Florida**

**12000 Alumni Drive**

**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@unf.edu

*This advanced course will take you beyond the blood basics and increase your knowledge and skills in bloodstain pattern analysis. We will also take an in-depth look at the judicial process for becoming qualified to give effective witness testimony.*

*“Hands-on” experience with actual bloodstain patterns and advanced chemical processing techniques will help strengthen your recognition and analytical abilities and enhance your knowledge of various applications.*

*We will analyze case studies to teach you how to prepare and document your findings and a moot court exercise will give you an opportunity to testify about your conclusions. We will also examine the Daubert Decision and other expert witness issues that may impact your testimony.*

*This course will help law enforcement and civilian investigators present their opinions involving bloodstain patterns in a courtroom setting with confidence, while meeting the minimal requirements for expert testimony.*

### *Topics Include*

*Pattern identification*

*Case studies*

*Preparing experiments for confirmation of findings*

*Preparing exhibits for the courtroom*

*Moot courtroom testimony*

### *Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel, and prosecuting attorneys*

*This class is restricted to active law enforcement and prosecuting attorneys employed by governmental agencies.*

September 22, 2025  
- September 23, 2025

**Property and Evidence Room Management**  
**Altamonte Springs Police Department**  
**2nd Floor Training Room, 225 Newburyport Avenue**  
**Altamonte Springs, FL 32701**  
08:00 AM - 05:00 PM EST  
Mary Ankenbauer, 904-620-4786  
info@unf.edu

*From the time evidence is collected, through the presentation of evidence in the courtroom, to the final disposition and disposal, this course will provide you with all the information you need to maintain the security and integrity of your department's property and evidence. You will learn how to properly document, inventory, control, dispose of and purge property and evidence of all types.*

*Lectures will focus on the physical security of the property/evidence room as well as the legal issues pertaining to the operation of such facilities. OSHA requirements and regulations will be discussed and storage solutions for the evidence room will be explored. You will learn about the special considerations surrounding hazardous, bio-hazardous, and other special risk items as well as preferred procedures for packaging the evidence for storage and submission for testing.*

#### *Topics Include*

*Physical security of property and evidence rooms*  
*Policies and procedures relating to the evidence function*  
*Legal issues pertaining to the operation of evidence facilities*  
*Evidence packaging for storage and submission for testing*  
*Evidence integrity*  
*Computerization of property and evidence rooms*  
*Narcotics destruction - burn procedures and certification*  
*Bio-hazardous evidence storage and destruction*  
*OSHA requirements and regulations*  
*Personal safety issues*  
*Storage solutions*

#### *Audience*

*Sworn law enforcement officers, as well as non-sworn property and evidence custodians and supervisors responsible for overseeing their departments' property and evidence facilities*

September 29, 2025  
- October 1, 2025

**Crimes Against Children**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*In this fast-paced course, you will learn processes and techniques that apply specifically to crimes against children. From the initial call to the courtroom, you'll receive an in-depth analysis of investigative methodologies you can use to solve these crimes.*

*We will examine the persistent patterns of behavior of the seven types child molesters and teach you effective techniques for interviewing these criminals. We will also help you develop the skills needed to conduct forensic interviews of child victims and witnesses.*

*Using case studies, we will introduce you to the different classifications of evidence and how each applies to your investigation. You will learn how to prepare an expert search and seizure warrant for a preferential child molester to include seizing child pornography, child erotica, DNA and computer evidence.*

*Finally, we will discuss the criteria for amber alerts and the importance of the initial response to a child abduction. You will learn how to develop a Child Abduction Response Team (CART)—a multidiscipline, multijurisdictional team of experts—and how it can greatly improve your ability to recover a missing child.*

*Topics Include*

*Definitions and diagnostic criteria for the DSM-5  
Patterns, behaviors and characteristics of offenders  
Pedophilia and offender  
Investigative and interviewing techniques  
Preparing an expert search and seizure warrant  
Emerging investigative strategies  
Forensic interviews of a child  
Understanding predatory behaviors  
Developing a Child Abduction Response Team (CART)*

*Prerequisite(s)*

*It is recommended, but not mandatory, that you have completed a basic investigations course or have the knowledge of proven investigative techniques necessary to investigate most crimes against children cases.*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, military investigative personnel, non-sworn personnel who participate in investigations, and prosecutor's office personnel who investigate and prosecute crimes against children*

*This class is restricted to active sworn and non-sworn law enforcement, investigators, and prosecuting attorneys employed by governmental agencies.*

October 13, 2025  
- October 15, 2025

## **Economic Crimes Investigations: Current Trends**

**IPTM - University of North Florida**

**12000 Alumni Drive**

**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*Economic crimes have become the fastest growing and costliest crimes in the U.S. in recent years. Frauds are also one of the most difficult to understand and investigate. This updated course explains the complexities of fraud investigations and arms you with a systematic approach and specific techniques for handling a wide range of financial and consumer fraud-related crimes. It relies heavily on student interaction, case studies, and practical scenarios to help increase your understanding of the ever-changing nature of these investigations.*

*Our goal is to provide you with current information effecting Economic Crimes Investigators with different levels of training and experience. Topics range from simple check fraud and credit card fraud to identity theft and major offenses like embezzlement, internet scams, and Ponzi schemes. In addition, you will learn current trends involving electronic fund transfers and cryptocurrency, as well as how to investigate these crimes. We will show you how to handle the day-to-day issues with conducting these investigations. These issues include how to determine the appropriate jurisdiction for cases, which cases are civil or criminal, and reviews a variety of investigative resources to assist the students with their investigations. We will also provide you with receive recent examples of a variety of legal processes needed to conduct these investigations.*

### *Topics Include*

#### *Introduction into Economic Crimes:*

*Triaging cases*

*Determining civil vs. criminal*

*Jurisdictional issues*

*Case management*

*Subpoenas, search warrants and court orders*

*Resources*

*Legal process*

#### *Classifying and investigating the different types of fraud:*

*Check fraud*

*Credit/debit card fraud*

*Identify theft*

*Internet/computer crimes*

*Embezzlement*

*Ponzi/pyramid schemes*

*Money laundering*

*Racketeering*

*EFT's/cryptocurrency*

*Audience*

*Patrol officers, criminal investigators, and economic crimes unit personnel who are*

*responsible for conducting fraud investigations*

*This course is restricted to sworn and non-sworn law enforcement personnel.*

October 20, 2025  
- October 24, 2025

**Criminal Investigation Fundamentals**

**IPTM - University of North Florida**

**12000 Alumni Drive**

**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This course will provide you with in-depth instruction of the processes and techniques that apply to all aspects of criminal investigations, from the initial response to the scene to the final courtroom presentation.*

*You will learn methods to investigate property crimes up to violent crimes against persons. We'll show you how to properly locate and document the physical evidence to aid in your investigative efforts. Techniques for interviewing witnesses, victims and suspects will be covered. You will also learn about networks and databases that can assist you in the investigative process.*

*During the course, we will teach you how to perform basic investigative duties and prepare you for future, more specialized training.*

*Topics Include*

*Basic investigative responsibilities*

*Case assignment and case load management*

*Recognition of physical evidence*

*Interviewing witnesses and suspects*

*Using confidential sources of information*

*Property crimes: burglary, economic crimes, organized retail crimes*

*Crimes against persons: sex crimes, robberies, death investigations*

*Use of DNA and social media*

*Electronic evidence: cell phones, cell sites, geo-fencing, Wi-Fi downloads, and more*

*Case reporting and documentation*

*Sources of intelligence*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel, and non-sworn personnel who must effectively interact with sworn officers*

*This course is restricted to active sworn and non-sworn law enforcement and medical examiner personnel.*

November 3, 2025  
- November 4, 2025

**Suicide Investigation**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**  
08:00 AM - 05:00 PM EST  
Mary Ankenbauer, 904-620-4786  
info@iptm.org

*Proving suicide can be a daunting task for the investigator due to factors such as family denials, scene interference, insurance issues, and the basic stigma surrounding an intentional self-inflicted death. This course is specifically designed to help you overcome these difficulties by providing you with the skills necessary to thoroughly and properly investigate the death and to recognize and document all indicators of suicide. Your thorough investigation can be the sole basis for a Medical Examiner/Coroner to rule the manner-of-death as suicide.*

*The reasons one decides to take his or her own life can be psychological, biological, social or a combination of the three. We will explore each of these reasons in-depth. We will also cover the physical possibility of suicide – i.e. could the deceased have physically killed themselves, the most common methods employed, and the development of intent.*

*Classroom lectures and “case analysis” exercises will be used to teach you the proper steps to take when investigating suspected suicides. You will also be given a number of recommendations for dealing with the family of the victim of suicide.*

#### *Topics Include*

*Reasons for family denial of suicide*  
*Dealing with the family of the decedent*  
*Determining the physical possibility of suicide*  
*Developing and detailing all indications of intent on the part of the decedent*  
*Developing motive*  
*The most common methods of suicide*  
*Importance of determining the body position when a firearm is utilized*  
*Differentiating between an intentional hanging and an autoerotic death*  
*Reasons why a person may commit suicide*  
*The biological, psychological and sociological perspectives of suicide*

#### *Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, and military investigative personnel.*

*The course is restricted to active sworn and non-sworn law enforcement and medical examiner personnel.*

November 17, 2025

**Homicide Investigation**  
**IPTM - University of North Florida**  
**12000 Alumni Drive**  
**Jacksonville, FL 32224**  
08:00 AM - 05:00 PM EST  
Mary Ankenbauer, 904-620-4786  
info@iptm.org  
*Whether you are the first responder or the lead investigator, this course will give you the knowledge and skills to thoroughly and professionally investigate any possible homicide situation.*

*We will show you the various types of homicides that you may encounter and common approaches to each. You will learn a systematic process for handling the crime scene, from the initial approach through scene documentation and evidence collection. And, you'll see how the latest technology and forensic sciences can assist you in your investigation.*

*Beyond the crime scene, you'll also learn about criminal profiling, interrogation techniques and how to handle the news media's involvement.*

*Topics Include*

*Death scene preservation*  
*Duties of the first officer on the scene*  
*Investigative procedures at the death scene*  
*Team approach to death investigations*  
*Autoerotic death investigations*  
*Causes and manner of death*  
*Time of death determination*  
*Criminal personality profiling*  
*Organized vs. disorganized crime scenes*  
*Death scene search techniques*  
*Handling the news media in death investigations*  
*Suicide investigations*  
*Homicide interrogation techniques*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel*

*Class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This course will further enhance the skills you acquired in IPTM's Homicide Investigation course and supply you with the knowledge and abilities to handle even the most challenging homicide investigations.*

*You will learn how to organize a complex homicide investigation and how to apply advanced forensic techniques to the case. We will discuss criminal profiling and abnormal psychology and you will learn specific interrogation techniques to use on the suspects.*

*Lectures during the course will be held to a minimum. Instead, emphasis will be placed on practical exercises. You will be provided the opportunity to apply the skills you have acquired while studying complex homicide cases presented by the instructors.*

*Topics Include*

*Organization of a complex homicide investigation*  
*Criminal investigative analysis (criminal profiling)*  
*Abnormal psychology for investigators*  
*Interrogation techniques for homicide suspects*  
*Application of advanced forensic techniques*  
*Reconstruction of a high profile homicide case*

*Audience*

*Patrol officers, newly assigned and seasoned detectives, investigations supervisors, crime scene technicians, medical examiner and coroner investigators, military investigative personnel*

*This class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

December 11, 2025  
- December 12, 2025

## **Bloodstain Interpretation for Detectives**

**IPTM - University of North Florida**

**12000 Alumni Drive**

**Jacksonville, FL 32224**

08:00 AM - 05:00 PM EST

Mary Ankenbauer, 904-620-4786

info@iptm.org

*This course is specifically designed for detectives who investigate violent crimes but are not responsible for the documentation or collection of blood evidence.*

*The objective is to enhance the knowledge of homicide and crimes against persons detectives in various areas of bloodstain pattern analysis, with an emphasis on understanding the value of bloodstain evidence and how it can be effectively applied as a forensic tool throughout their investigation. We will provide you with a cohesive understanding of the cause, effect, and implications of different bloodstains and patterns, as well as the actions that caused them.*

*We will use several actual case studies to emphasize and illustrate the concepts and fundamentals discussed during lectures. This course is not designed for crime scene investigator, as it does not have a laboratory component.*

### *Topics Include*

*How to recognize bloodstains and patterns that provide probative information regarding the actions that caused the blood-letting events and movements of individuals - during and after the events*

*How to extrapolate relevant evidence from altered scenes*

*How to recognize the differences between medical and suspicious deaths*

*Understanding the documentation processes available to capture the bloodstains and patterns for future analysis by an expert*

*Types of bloodstains to select for DNA analysis that will provide the most probative value to the investigation*

*What to expect from a bloodstain pattern analysis conducted by an expert*

*How expert analysis can be applied throughout the investigation and its relevance in criminal proceedings*

### *Audience*

*Law enforcement, detectives, investigators, and military investigative personnel. It is not designed for crime scene investigator, as it does not have a laboratory component.*

*Class is restricted to sworn law enforcement officers and those personnel assigned directly to law enforcement agencies.*

January 5, 2026

**Advanced Shooting Analysis & Reconstruction**

**Orlando Police Department - Training Facility**

**100 George DeSalvia Way**  
**Orlando, FL 32807**

08:30 AM - 05:30 PM EST

Jim Molinaro, (908) 625-0958

jmolinaro@highlandsforensics.com

*This is a 40 hour Advanced Shooting Analysis & Reconstruction Course offered by Highlands Forensics and hosted by the Orlando Police Department the week of January 5, 2026 to January 9, 2026.*

*This course will pick up where a basic SIR course ends by providing instruction on topics concerned with the process of performing an objective and unbiased shooting scene reconstruction. Lecture topics will include the methodology involved, in the reconstruction process, incorporating bloodstain evidence and the results from autopsy into a reconstruction and a detailed analysis of the human body as a target. Attendees will work in small groups to process a motor vehicle shooting scene and be given an actual shooting case for each small group to perform a shooting scene reconstruction. Ultimately each small group will prepare a PowerPoint presentation of their findings. All materials will be provided by the host and Highlands. The only attendee requirements are to have attended a Basic SIR course and a laptop with Microsoft Word and PowerPoint.*

February 9, 2026  
- February 11, 2026

**Recovery of Human Remains**

**Orlando Police Department**  
**100 George DeSalvia Way**  
**Orlando, FL 32807**

08:00 AM - 05:00 PM EST

Meredith Tise, 727-275-0327

meredith@suncoastforensics.com

*Join us for three days (24 hours) of hands-on training focused on the search, documentation, and recovery of buried and surface scattered human remains. This training will include the following topics:*

*Introduction to Forensic Anthropology*

*Human versus Non-Human Bone Identification*

*Human Osteology*

*Postmortem Modification to Human Remains*

*Recovery of Surface Scattered Skeletal Remains*

*Recovery of Buried Human Remains*
