Conceptual Estimating
MicroTek - Denver
999 18th Street, Suite 300, South Tower
Denver, CO

One of the hallmarks of design-build project delivery is early knowledge of costs. This course introduces the fundamentals of conceptual estimating and how to go about assessing risk and calculating costs before design is complete. (6 CEUs)

At the end of the course students will be able to:

Describe the role of the estimator in design-build
Describe the various influences affecting building costs
Describe the various types of estimates
Describe how estimates are organized using standard estimating formats
Explain how to use an estimating manual
Describe how unit prices are developed
Explain the fundamental concepts of value engineering
Explain how to manage and control costs throughout the design process
Describe the various checks and balances needed to ensure the reliability of the estimate
