CE Webinar "Avian Influenza A (H5) Surveillance in Oregon"

04:00 PM - 05:00 PM EST

Dr. Rebecca Falender and Dr. Ryan Scholz will present "Avian Influenza A (H5) Surveillance in Oregon" This presentation will highlight the collaborative efforts between Oregon Department of Agriculture, Oregon Health Authority, Oregon Fish and Wildlife, Oregon State University, and our federal partners to perform comprehensive avian influenza surveillance in Oregon. This covers the emergence of avian influenza in Oregon, the identification of avian influenza in two pigs in the fall of 2024, active and passive monitoring of wild and domestic birds and livestock, bulk tank milk (BTM) surveillance, and wastewater surveillance for influenza A and the H5 subtype. This review presents the findings from avian influenza surveillance conducted across Oregon since the emergence of clade 2.3.4.4b in 2020.

This webinar has been granted up to one hour of CE credit by RACE. Participants must be active members of the ACVPM or its partner organizations and must participate for at least 50 minutes of the webinar to receive a one hour CE certificate.

When: 10 February 2026 at 4:00 pm Eastern

Where: Zoom Webinar

Cost: Free! (a benefit of being an active or emeritus ACVPM Diplomate, an ACVPM candidate, or an active member of AAFSPHV, NAFV, NASPHV, or USAHA)

To Register for the Webinar: Click [HERE](#)

University of Illinois Multi-Species Justice Symposium: Paradigms, Practices, Possibilities
01:00 PM - 05:00 PM CST

Friday, February 13th, 2026

Alexander Blanchette

Daina Bray

1:00 PM - 5:00 PM

Levis Faculty Center, Room 210

919 W. Illinois St, Urbana

Event Description

How does recognizing the fundamental entanglements of humans and the more-than-human world impact notions of "justice"? Drawing on perceptions from diverse communities, disciplines, and social, political, and historical contexts, this symposium will provide a space for us to grapple with the question: What might a more just world or worlds look like in the 21st century?

Alex Blanchette and Daina Bray join an interdisciplinary group of scholars for an extended conversation about multi-species justice.

1:00 PM | Opening remarks, Jane Desmond

1:15 PM | Alex Blanchette, The Biology of Dignity: Workplace Democracy, Multispecies Health, and American Slaughter

This talk revisits the history of slaughterhouse unionization and workplace democracy as an inadvertently more-than-human project. The talk's goal is not to romanticize labor in troubling environments, however, but instead to theorize the ways human solidarity could ripple through animal bodies, minds, and the microbial ecologies of the rural United States.

2:00 PM | Conversation with Will Sander (Director, DVM MPH joint degree program)

2:15 PM | Audience q&a

2:45 PM | Introduction, Kenworthy Bilz (Law)

3:00 PM | Daina Bray, We Are In This Together: Farmed Animals & Multi-Species Justice

Drawing from her background in farmed animal advocacy, Daina will discuss how the law's failure to address the many externalized harms of industrial animal agriculture endangers not only the animals themselves but also workers, farmers, the environment, the public health, and food security. Legal exemptions for animal agriculture—grounded in the treatment of animals as property available for commercial utilization—are creating many present harms and endangering our collective future.

3:30 PM | Conversation with Chris Green (Executive Director, Animal Legal Defense Fund)

3:45 PM | Audience q&a

4:00 PM | Closing panel and closing remarks

Evolving Tools for Bed Bug Control: Technology, Treatment, and Sustainability

02:00 PM - 03:00 PM EST

As bed bug challenges evolve, so do the tools and technologies used to manage them. In this webinar, Dr. Aaron Ashbrook, Assistant Professor of Urban/Peri-Urban Entomology at Louisiana State University, will explore the latest advances in bed bug control, including new insecticides, detection methods, and integrated management strategies. We will also discuss the environmental implications of infestations and control measures, and how effective management can reduce contamination risks and improve outcomes across different settings. The presentation will highlight practical considerations for selecting and implementing these tools in real-world environments, from residential properties to commercial and public facilities. Participants will gain a clearer understanding of how emerging technologies and evidence-based practices can enhance program efficiency and long-term success.

9th World One Health Conference - save the dates!

08:00 AM - 05:00 PM MEA

Join us at the 9th World One Health Congress in Lisbon, Portugal!

In 2026, the World One Health Congress returns for its ninth edition, bringing together a global community of experts dedicated to advancing One Health science and policy. Over the course of four days, the Congress will feature a dynamic and forward-thinking agenda, with parallel tracks covering One Health science, antimicrobial agents and resistance, and the science-policy interface, among other critical topics.

This leading international forum will foster discussions on major One Health challenges, facilitate the exchange of cutting-edge research, and highlight policy developments shaping the future of health for humans, animals, and the environment. Through an open call for abstracts, groundbreaking work from distinguished scientists and thought leaders will take center stage.

Let's keep the momentum going and make the next 9th World One Health Congress in 2026 an even greater success. Together, WE ARE One Health!
