(2 hours CE) - The mysterious FIP: diagnosis, treatment and management of complicated cases, relapses and comorbidities in cats with FIP

Dr. Petra ?erná PhD, DACVIM (SAIM) Dipl. ECVIM-CA, DABVP (Feline), MANZCVS

This lecture will cover the diagnosis of FIP and the complexities in FIP diagnosis. This lecture will focus on managing complicated cases of FIP, what to do if cats are not responding to medications, relapses of FIP as well as cats that develop comorbidity such as IMHA, sepsis, pneumonia etc. We will also address questions about treating cats with FIV/FeLV. We will discuss relapses of FIP as these are not so common and making sure we do not over-diagnose FIP relapse and avoid both unnecessary antiviral treatments as well as provide appropriate therapy.

Learning objectives:

1. Understand how to best diagnose FIP (Feline Infectious Peritonitis)

2. Identify comorbidity and complications that can occur in FIP and how to manage them

3. Understand how to diagnose and manage FIP relapses

*Don't miss this opportunity to expand your knowledge and refine your skills with insights from leading experts in their fields. We look forward to seeing you there!
